Source: Windows Central Crafting is vital if you want to succeed in Minecraft. After that, it's half the name of the game. In the early days of manufacturing it took hours to experiment to know not only what you could work out, but also how to produce it. Fortunately, years of polishing mean that minecraft's modern crafting system is accessible and easy to understand without losing the charm people loved about the original system. The key to crafting in Minecraft is to have a craft table nearby for use. Players can produce very limited things on their own, mostly limited to sticks, wooden boards, a craft table and torches. Everything else requires the creation of a craft table. Crafting tables are easy to make though, and you can fill your entire house with them if you like. To create a crafting table, follow these steps: Make sure you have assembled the tree. You will need at least 1 deck of any kind (oak, spruce, birch or other) to make a craft table, but the tree is always useful to have. Source: Windows Central Open inventory by pressing X on the controller or E on your keyboard. The craft menus and inventory menus are the same. A two-panel screen will appear. Craft wooden boards using a wooden magazine in your inventory, or find wooden boards in the left pane or placing a wooden log in 2 square 2 square boxes in the right pane. Source: Windows Central Use your left screen to put wooden boards in your inventory immediately. If you used the right screen, you'll need to grab the wooden boards out of the box to the right of the 2 square on 2 square boxes and drag it to your inventory. Immediately use these wooden boards and either look for a craft table in the left pane, or place one wooden share in each box with an area of 2 squares on 2 square boxes in the right pane. Use the left screen to immediately place the crafting table in your inventory. If you used the right screen, you'll need to grab a craft table from the box to the right of the square On 2 square fields and drag it to your inventory. Now you have a table for crafting and and from this menu. Once you have a craft table at your disposal, a whole world of new features opens up. Using a craft table is as easy as making one. make sure the craft table is in your hand and use the right mouse button or left trigger on the controller to place it wherever you want. To use a table to create, just look directly at it and right-click or left trigger on the controller. When you use a craft table, the menu should look very similar, with one major exception: 2 squares per 2 square boxes from previously will now be 3 squares per 3 square boxes, greatly increasing how many features you have. Source: Windows Central Whenever you're in inventory or in the creation menu, you'll also see these two areas mentioned earlier. The panel on the left is essentially a recipe book. It has everything you can create in a game divided into categories (complete with search bar), so you can find exactly what you're looking for. By default it has Craftable switching to show you just what you are able to create with the items in your inventory, with creations you have some ingredients for shown in red. You can turn this off or on if you want to look at the recipe for other items. Of course, the correct panel will be much more useful when you are working at the table to create. The screen on the right shows your inventory as well as a box you can use for fabrication. Whenever you select a recipe in the left pane, the box on the right will be filled with the recipe in question, showing you what you need as well as how to place the items. To create something, you can either move the ingredients to the right place in the window on the right, or simply find the recipe on the left and click on it. If you don't need to see a recipe book, so to speak, you can turn it on or off using the left and right triggers on the controller or by clicking the two options in the upper-right corner of the inventory screen or creating it.
